Welcome Home.

This is evolved gaming gear, co-developed, tested and approved by eSport legend HeatoN. Serious performance with a sophisticated style that fits a new home of victory, without compromise.

ZON – Home of Victory

APPROVED BY A LEGEND

ZON – Home of Victory is tournament-grade gaming gear that stands out for its performance and responsiveness under pressure. But don't take our word for it. Take the word of HeatoN who co-developed and approved each ZON product after immense amount of testing and tweaking every last detail. And it wasn't just about how everything felt, it was also about how everything looked.

HeatoN is a legend in the world of eSports. One of the very first professional gamers, he's always been a fearless pioneer, taking himself – and eSports – to new heights. With ZON, he saw the opportunity to be there from the start, helping bring a new standard in gaming gear design and performance to the world. And most importantly bringing it to people like himself – gamers who need to balance their passion for gaming with the realities of everyday life.

The clean, stylish looks of ZON gaming gear were everything he wanted for himself and his home life. But to get his seal of approval, HeatoN Select, it had to deliver tournament-grade performance. After 500 hours testing and optimizing each product, feeling every last sensation and response he was getting from his hands, eyes, heart and mind, HeatoN was finally satisfied. The result is a selection of gaming mice, mousepads, keyboards and headsets that he considers to be among the best he's ever used. And good enough to be HeatoN Select.

Precautions

Incorrect use will damage the mouse, so please pay attention to the following usage points:

1. Avoid using the mouse on surfaces with low finishes such as clothing, newspapers, carpets and rough wood.
2. Do not bump the mouse.
3. Do not put the mouse in liquid.

If the mouse light is on after shutdown:

The motherboard's mouse and keyboard boot function is the most common cause of the mouse still lighting up after shutdown.

Säkerhetsföreskrifter

Felaktig användning skadar musen, så var uppmärksam på följande användningsföreskrifter:

1. Undvik att använda musen på ojämna ytor såsom kläder, tidningar, mattor och grovt trä.
2. Undvik att stöta till musen.
3. Sänk inte ned musen i vätska.

Om ljuset från musen är påslaget efter avstängning: Moderkortets startfunktion för mus och tangentbord är den vanligaste orsaken till att ljuset från musen fortfarande är påslaget efter avstängning.

Forsiktighetsregler

Feil bruk vil skade musen, så ta hensyn til følgende punkter ved bruk:

1. Unngå å bruke musen på ujevne overflater, feks. klær, aviser, tepper og grovt treunderlag.
2. Ikke rist musen.
3. Ikke senk musen ned i væske.

Hvis lyset på musen er på etter at du har slått av:
Musen får fortsatt strøm fra hovedkortet. Det er den vanligste grunnen til at musen fremdeles lyser etter at du har slått av.
