User Manual

Welcome Home.

This is evolved gaming gear, co-developed, tested and approved by eSport legend HeatoN. Serious performance with a sophisticated style that fits a new home of victory, without compromise.

ZON – Home of Victory

APPROVED BY A LEGEND

ZON – Home of Victory is tournament-grade gaming gear that stands out for its performance and responsiveness under pressure. But don't take our word for it. Take the word of HeatoN who co-developed and approved each ZON product after immense amount of testing and tweaking every last detail. And it wasn't just about how everything felt, it was also about how everything looked.

HeatoN is a legend in the world of eSports. One of the very first professional gamers, he's always been a fearless pioneer, taking himself – and eSports – to new heights. With ZON, he saw the opportunity to be there from the start, helping bring a new standard in gaming gear design and performance to the world. And most importantly bringing it to people like himself – gamers who need to balance their passion for gaming with the realities of everyday life.

The clean, stylish looks of ZON gaming gear were everything he wanted for himself and his home life. But to get his seal of approval, HeatoN Select, it had to deliver tournament-grade performance. After 500 hours testing and optimizing each product, feeling every last sensation and response he was getting from his hands, eyes, heart and mind, HeatoN was finally satisfied. The result is a selection of gaming mice, mousepads, keyboards and headsets that he considers to be among the best he's ever used. And good enough to be HeatoN Select.

Specifications

Headset

Driver	53 mm
Frequency response	20Hz-20kHz
Impedance	60Ω
Sensitivity	100±3dB
Cable length	2.4 m

Specifications

Microphone

Microphone type	Omnidirectional
Frequency response	50 Hz - 10kHz
Sensitivity	-58dB
Product size	240 x 185 x 117 mm
Product weight	456 g

Windows XP /Vista/Win7/Win8/ Win10/
(Internet connection for optional software download)

Product overview

Front

1 Adjustable headband

2 Ear pads

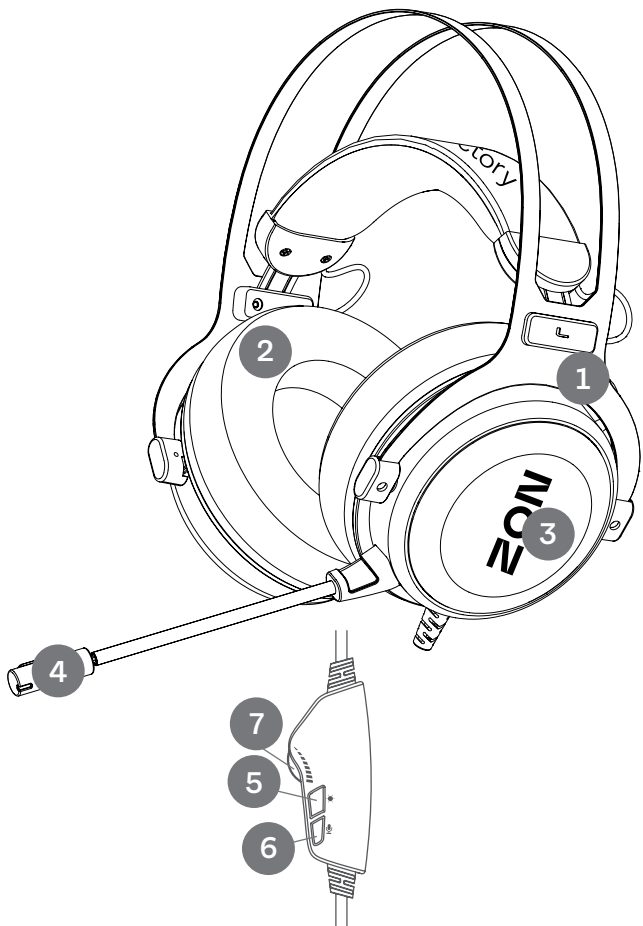

3 RGB light

4 Microphone

5 RGB light on/off & adjustable

6 Microphone on/off

7 Decrease/increase volume

Three lighting mode

Single click:	Change color
Double click:	Breathing mode
Triple click:	Color swap mode

Precautions

Incorrect use will damage the headset, so please pay attention to the following usage points:

1. Do not bump the headset.
2. Do not put the headset in liquid.

If the headset light is on after shutdown:

The motherboard's boot

function is the most common cause of the headset still lighting up after shutdown.

Specifikationer

Hörlurar

Diameter högtalare	53 mm
Frekvensåtergivning	20Hz-20kHz
Högtalarimpedans	60Ω
Högtalarkänslighet	100±3dB
Kabellängd	2.4 m

Specifikationer

Mikrofon

Mikrofon typ	Rundstrålande
Frekvensåtergivning	50 Hz - 10kHz
Mikrofonkänslighet	-58dB
Produkt storlek	240 x 185 x 117 mm
Produkt vikt	456 g

Windows XP /Vista/Win7/Win8/ Win10/
(Internetanslutning för valfri nedladdning av programvara)

Produktöversikt

Fram

1 Justerbart huvudband

2 Öronkuddar

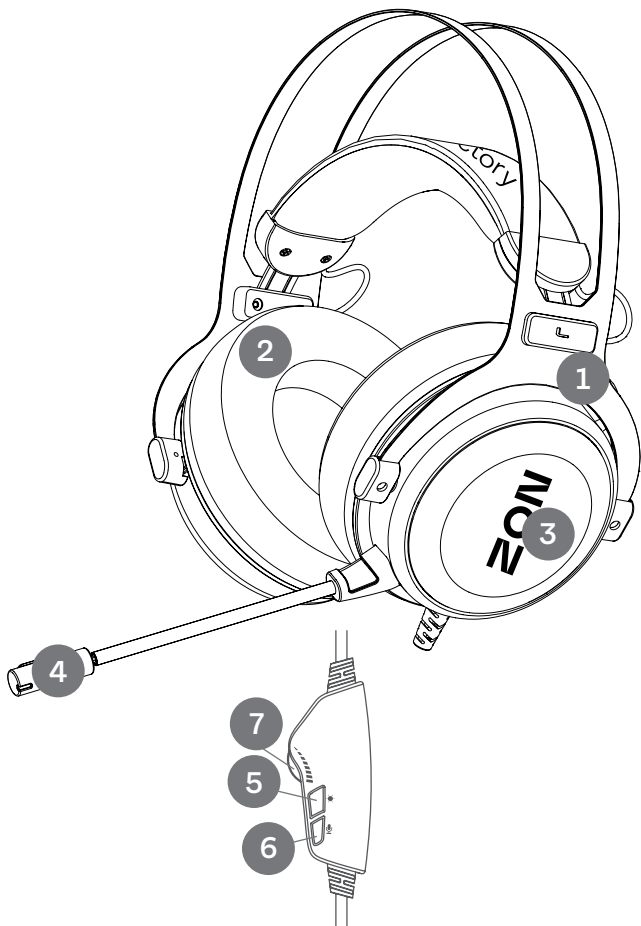

3 RGB-ljus

4 Mikrofon

5 RGB-ljus på/av och justerbart

6 Mikrofon på/av

7 Minska/öka volym

Tre belysningslägen

Enkelt klick:	Byt färg
Dubbelklicka:	Andningsläge
Trippelklick:	Färgbytesläge

Säkerhetsföreskrifter

Felaktig användning skadar hörlurarna, så var uppmärksam på följande användningsföreskrifter:

1. Undvik att stöta till hörlurarna.
2. Sänk inte ned hörlurarna i vätska.

Om ljuset från hörlurarna är påslaget efter avstängning:

Moderkortets startfunktion är den vanligaste orsaken till att ljuset från hörlurarna fortfarande är påslaget efter avstängning.

6 Mikrofon på/av

7 Reduser/øk volum

Tre lysmodi

Enkelt klikk:	Bytt farge
Dobbelklikk:	Pustemodus
Trippel klikk:	Fargeendringsmodus

Forsiktighetsregler

Feil bruk vil skade hodetelefonene, så ta hensyn til følgende punkter ved bruk:

1. Ikke utsett headsettet for støt eller slag.
2. Ikke senk headsettet ned i væske.

Hvis lyset på headsettet er på etter at du har slått av:

Tastaturet får fortsatt strøm fra hovedkortet. Det er den vanligste grunnen til at tastaturet fremdeles lyser etter at du har slått av.
